

WORK EXPERIENCE

THE HUFFINGTON POST

UX/UI Designer

JUNE 2015 - PRESENT

I help shape how people consume the news by working with our product and development teams to plan, design, prototype and implement iterations to our website. Our most recent accomplishment was the launch of our redesigned website (complete with some new branding!). I also wireframed and designed HuffPost's Contributor Platform, the CMS that powers a network of over 80,000 bloggers who share their writing with the world.

TOUGH MUDDER

Visual Designer

MAY 2014 - JUNE 2015

I led all aspects of design for Tough Mudder HQ. This included UX/UI for the website, designing landing pages, email templates and merchandise, on-site experiences, obstacle branding, RFPs and video graphics.

NANO

Freelance Designer

JAN 2014 - APRIL 2014

I was brought in to help redesign RI Global's website, a non-profit that advocates for the disabled around the world. We worked to clearly present their mission and achievements while also helping them raise money.

PROPS INC.

Web Designer

JAN 2013 - JAN 2014

I was responsible for wireframing and designing WordPress sites for local Long Island businesses that ranged from chiropractors and lawyers to motorcycle builders and electricians.

YELLI

UX/UI Designer

AUG 2011- DEC 2012

I helped concept, wireframe and design an iPad based loyalty program for businesses to reward their regular customers.
